

## CLAIMS

What is claimed is:

1. In an outrigger holder apparatus mounted on the T-top of a boat, the improvement comprising:
  - 5 a housing means fixedly mounted on said T-top;
  - an outrigger holder means mounted in said housing for rotation therein;
  - a bearing means engaging said outrigger holder means and said housing means for providing a bearing therebetween to bear the weight of the outrigger holder means upon rotation of the outrigger holder means; and
  - 10 an indexing means engaging said outrigger holder means and said housing means for rotating the outrigger holder means to selected positions; said indexing means having a first portion engaging said housing means for rotation therewith and a second portion which can be selectively engaged and disengaged with said first portion; said second portion when disengaged being positioned to engage and rotate said outrigger holder
  - 15 means without bearing the weight of the outrigger holder means.
